Kenneth,
I appreciate your assistance with the data reports.
We would be interested in attending the public meeting and the site visit beforehand.
Thanks,
Jessica

Jessica,
I'll have to check dates to make sure that July 2016 is the last time we collected samples. I was assigned to this site in June and all we have done so far is work on getting a task order done. We are just starting the RI so we will be doing additional sampling when we get the contract set up and when we get funding. I will look for the data reports. We will probably have a public meeting in September and I may try to set up a site visit before the public meeting. Let me know if you want to participate in any of this. I will look for that data report and get back to you.

Subject: Lane Plating data

Hello Kenneth,
I am Jessica Kessinger with the DSHS Health Assessment and Toxicology Program. I am the health assessor and will be looking into the data and developing a Health Consultation document for the Lane Plating site. I have many documents for this site that were given to me by Bret back in January... I just wanted to ensure that we have all the data before we start this process. So I just wanted to ask a few questions...Has EPA conducted any data sampling events after what I believe to be the latest sampling event which was July 18-21, 2016? Also, could we have the analytical report on that sampling event? I did not receive it as a reference to the SI. Reference 42. (if it electronic that would be great!)

I look forward to working with you and would appreciate any invitations in regards to meetings/open houses/updates regarding this site.

Thanks,

Jessica Kessinger, MPH
